

**MANAGING TODAY'S CHALLENGING
BEHAVIORAL HEALTH INPATIENT
TREATMENT DEMANDS:
An Update for Psychiatric and Addiction Treatment Staffs**

OBJECTIVES

At the conclusion of this training, the participant should be able to:

- Describe essential staff skills for establishing and maintaining a therapeutic milieu.
- Identify specific ways to incorporate recovery concepts into short-term hospitalization.
- Outline ways in which peer specialists can be used in the inpatient setting and in which the patient perspective of the treatment experience can be incorporated.
- Describe techniques to reduce reactive aggression in children by reducing coping demands.
